

UPI-800TJ

Fireman Intercom Addressable Plug-in Jack Socket Outlet

Description

The UPI-800TJ addressable fireman's intercom phone jack socket outlet unit is powered by a 2-wire fireman intercom phone communication bus and supports connection without polarity. It must be used alongside the UPI-800TH plug-in handset. The UPI-800TJ model includes a built-in EXT terminal that allows the connection of multiple fireman intercom phone extensions, UPI-800TH intercom phone socket jacks, and manual alarm button jacks, facilitating communication among various addressable devices through the main 2-wire communication bus fireman's intercom control panel. This fireman intercom phone jack is designed with low standby quiescent current consumption, enabling widespread installation throughout the building to enhance the coverage area of the fireman intercom phone terminal system. Additionally, a red LED talk indicator on the front cover plate flashes when the UPI-800TH fireman's intercom phone handset is plugged into the female socket, signaling an established incoming communication with the control panel, accompanied by a buzzer tone.

Technical Specifications

Address range: 0 to 170.

Power supply mode: Bus power supply.

Communication Bus: UDA-BUS.

Use with Φ 6.5mm single core audio plug.

Standby current: $\leq 1.2\text{mA}$.

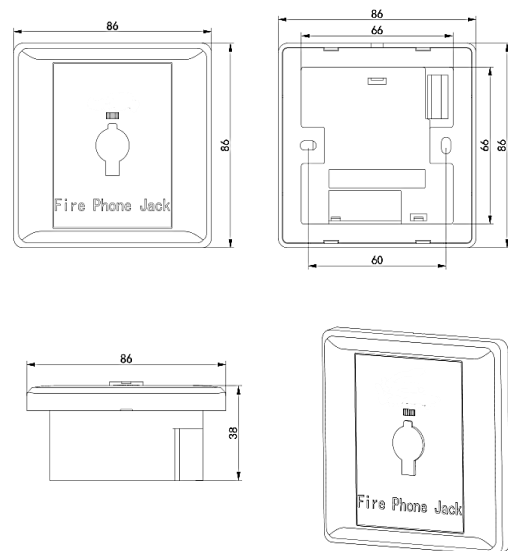

Call standby current: $\leq 50\text{mA}$.

Operation environment temperature: $0\sim 40^{\circ}\text{C}$.

Components temperature rise: $-25^{\circ}\text{C}\sim 55^{\circ}\text{C}$.

Dimension: 86mm \times 86mm \times 38mm.

Weigh: 50g.
